Comments: We know the stores service
men come for their runs which often
last all night, they commented of how dark it was
"in the center" in the sky at 10° elevation
about from the front of the country
store about 100' away. The clouds were swirling since
the beginning of time for "about a minute" they
were swirling slowly from 10° elevation to
30° elevation on a steamy cause. The
clouds swirled slowly then disappeared,
then suddenly in the center.

My personal observation - "It was a
yellow light in front consisting equal to
a search light placed from 150' with red
diamonds over it. " A pulsating bright
yellow light in the center and a
pulsating light at the rear with dots
of blue streaks coming off the rear.
(as in diamond) There was a thin
yellow shaded hazy visible line
connecting the three lights." At 8 P.M.,
two "legs" "pinted hot" were hanging from
the porch. The object was "slightly
~~smaller~~ ^{about} the size of full moon." The time in
sight estimated at 1½ minutes.
"At the same time I saw a large
tree first, the object defined
as "not so bright,"

(I went to the door with my mother
on April 12, 1961 got along at 10:15 AM
and estimated times)

RECORDED ON JAN 16.

"I saw a red Bennett. Red color
in the darkness while standing
on front of the 100 Street. It was
dark moon and dark. It flew
bright in Brooks Lane over street
level, accelerated very fast out of
sight."

"It was Red in front, Blue in back,
and orange in the middle. The blue
in the middle was a kind Bennett
light. The lights were steady."

"There was a very slight hum"

"The time in sight approximately
one minute."

"It sort of floated - 'glided' along
like an airplane flying."

"It looked like an over ground
fire ball."

"It was sightly smaller than a
full moon."
